THAT'S EASY TO
LEARN AND
GAURANTEED TO
CHANGE THE WAY
YOU LOVE YOUR
DOG!

THE WAY YOU LOOK AT HEALTH CARE IS ABOUT TO CHANGE!

A LETTER FROM THE FOUNDER

~ DEBI FAMELOS

For over a decade I've had the indescribable honor of creating better lives for countless dogs with mobility and health issues.

Every breed, every age, and every mobility condition has walked (or been carried) through my clinic doors. As you can probably imagine, it's an incredibly rewarding profession!

Humbling is a good word to use here.

To watch the transformation of dogs as they regain their ability to walk, run, play is nothing short of awe-inspiring.

It's equally humbling to watch the transformation of their families: from scared and desperate to relieved and elated!

We're a team here. A winning team!

As incredibly rewarding and enriched my life has been so far, I have to admit, bringing **Response5** into YOUR hands far surpasses any dreams I have about my life!

Let's place this skill into your hands shall we...

Debi is the founder of the **Canine Bowen Institute** in which she passionately teaches Animal Bowen Therapy.

Response5 is Debi's super power technique that she uses everyday in her successful Clinic.

Her goal is simple: to help you help your dog. With 5 easy to learn steps, Debi provides you with the tools to profoundly change the mobility health of all the animals in your life!

Veterinarians have little to no solutions for neurological issues!

Your Physician as well as your Animals Veterinarian, live, breathe and are governed by the same teachings:

Diagnostics - Medication - Surgery.

Even the "Specialists" that they happily send you off to, are limited to these three things!

When diagnostics leads to a neurological diagnosis they have two choices : Medication or Surgery.

That's it folks!...that's it!

So what do we do next?...we panic, we cry, are heart breaks and then we begin to search...

THE SEARCH IS OVER

Response5 is designed with **three** fundamental elements in mind:

#1- To give **YOU** the tools to help restore your dog's mobility health throughout a lifetime.

This is EMPOWERING!

#2- No matter what mobility issue arises, the same 5 steps are used.

This is the coolest feature of Response5 – Super easy!

#3- You become an active part of your dog's health care.

That's what you're looking for, right?

Where ever you go with your dog, you have the built in solution (in your hands) to create physical change!

Note: Response5 is all about creating CHANGE not providing temporary RELIEF.

What Conditions Will Response5 Address?

The following is a short list of some of the common areas that Response5 can help with to make real and significant changes in your dog's life:

Arthritis – Elbow and Hip Dysplasia – **Knee Injuries**

Post Surgery Recovery – **Loss of Coordination**

General Overall Stiffness – Sudden acute injuries

Long standing issues – **Spinal cord injuries/Stroke**

Degenerative Myelopathy!...and so much more.

Patsy from Lunenburg Nova Scotia writes ~

Response5 is a well formatted site, clearly explained with excellent communication with the Instructor.

I've experienced amazing results immediately following Response5 sessions.

I teamed up with a Golden Retriever of 14 1/2 years recently who had an episode of vestibular dysfunction and was literally flat on the floor for seven days. Prior to this, his hind legs were not always cooperative going up and down stairs and his tail had lost its wag. Early on during his confinement, I went to give him a Response5 treatment. Fast forward 7 days. He was up on his feet and moving better than before! Once he had regained his sense of balance and strength, he was determined to go up and down stairs. He can do so much better than before the episode. He literally runs down the yard now. I am convinced that the Response5 treatments followed by almost a week of inactivity have been key in his recovery and overall improvement in mobility.

WHAT THE HECK IS

Response5 is Neurological Restoration!

Now you're thinking, "What the heck is Neurological Restoration?"

Allow me to clarify with **three simply points**:

#1 Neurological means your dog is being treated from the nervous system out! Using this science based way of connecting with the central nervous system your dog not only improves, but improves quickly.

#2 Approaching all mobility issues via a direct communication with the central nervous system allows the brain and the nervous system to reconnect and allow the pathways to reset and return to proper function.

#3 Here's the best part, this is a gentle and non-invasive therapy. I promise you, you're dog will be snoring by the end of the session.

Debi reflects on Senior dogs...

There is no question in my mind that Response5 will be used when any dog that is 10 years or older comes through my clinic doors! I have a very large "box of tools" to choose from, each of them has a place and a purpose, yet the 5 simple steps of Response5 is by far my most used for Senior Dogs.

I can count on it to start the healing process, no matter what condition the dog is dealing with.
I can count on it to be powerful enough without overwhelming the body's systems.
I can count on it without hesitation.
...and it has never let me down!

Response5 has a unique process of healing, especially with Seniors, beginning with a new found "spark" for life. Love that about Response5!

Bob and Louise from Kentucky ~

We're urging anyone to add this skill to your life! Out of desperation to help our aging dog with **Degenerative Myelopathy**, I signed on to Response5. Within 3 weeks my wife and I were seeing noted differences. Better stability, less hesitation walking on the hardwood floors and a definite increase in energy. Debi's generous support was incredible!

Mary and 12 year old Cinnamon

A definite increase in energy! Less stiffness and a much calmer demeanour.

The 5 steps of Response5 are life-changing and easy to execute!

A nice blend of reading/pictures/video's.

Debi was very easily available and very good at answering any queries along the way.

Maureen from Pennsylvania

Discovering Response5 was the answer to a desperate prayer for a miracle. Learning and using Response5 has been an incredible journey from despair to joy and wonder. My passion has always been animals, but I never dreamed that I would be involved in restoring their health. When my 8 year old German Shepherd was **diagnosed with DM**, I wanted something that would work and not be a burden to him or our family. This therapy has restored his mobility and vitality!

THE CONFIDENCE BEHIND Response5

With over a decade of study, experience and proven results, Response5 has long since left my own hands and now sits in the hands of people in 11 different countries!

Once I was 100% confident that I was getting proven results within my own Clinic with issues such as :

- Vestibular (Vertigo) - thats how I first created it!!!
- Arthritis
- Spinal Cord injury - from paralysis to walking in three weeks (yes I was shocked!)
- **Degenerative Myelopathy** (elated to find a solution!)
- Hip Dysplasia
- Laryngeal Paralysis
- Spinal stroke

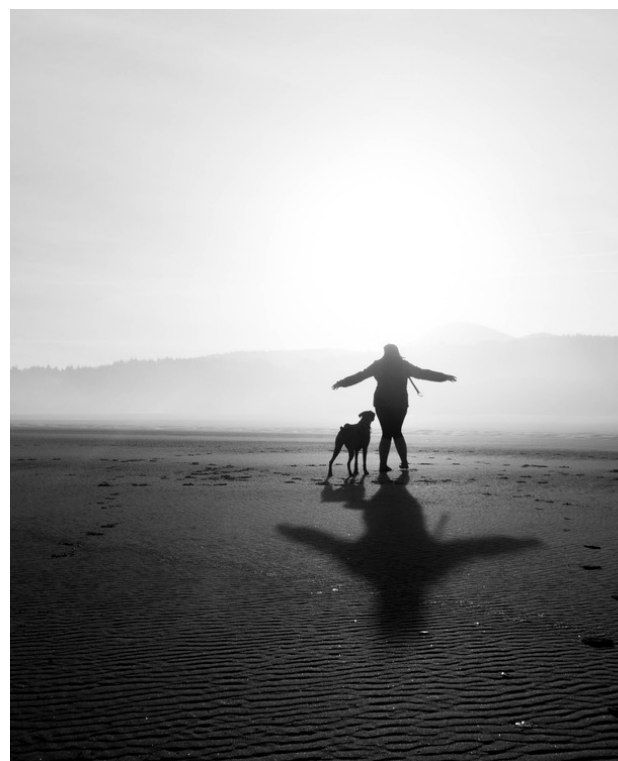

I thought, "This is WAY too incredible not to share!"

So I did!

Response5 became part of my teaching for the Animal Bowen Therapy Practitioner course.

It became a local class for Families within my community,

And...it made its online debut in 2106 after hundreds of world wide requests.

*I came across this site in hopes of finding some suggestions for my 9 year old Lab with hip dysplasia. What I discovered is that it's never too late to teach an old dog new tricks. That's me! Thanks to Response5, Ruby is now running around the backyard again! I did it! So Grateful,
Sharon*

Admittedly I was a bit nervous to learn a new skill, but it was so much easier then I'd expected! Loved the videos, I felt like I was getting a one on one private lesson!

~ Catharine

Response5

This is Izacc. He's an incredible friend, Teacher and all round fabulous guy!
I use Response5 to aid his digestion, tweak his sometimes wonky right hip,
and as a bi-weekly maintenance plan.

- **Debi Famelos**

You've
got
this!
(for a
lifetime)

Unlike any other item, service, test,
medication, food...that you purchase for
your dog, Response5 is an easily learned
skill that never needs replacing.

For the price of one average Vet visit (or
less) you'll hone a skill that has a lifetime
use for an endless list of conditions!

**GRAB YOUR EXCLUSIVE DISCOUNT
CODE ON THE LAST PAGE!**

In fact Response5's effectiveness comes
with a warning:

It's highly addicting!

Once you've achieved results with your
own dog you'll be searching for other
animals to help!

...and that couldn't make me happier!

- Three detailed videos for each of the 5 Steps including a slow motion video
- Learn the do's and do not's of a Response5 session
- Free Response5 Certification** to solidify your skills and help other animals within your community!

FAQ'S

There's always a question or two that you may want to ask. Look to see if your question has already been answered. If not, give me an email and I'll answer it for you! [familiar](#)

My dog is tiny and I still move up an inch with each part of the Step.

You will need to adjust accordingly. Either a 1/2 inch or 1/4 inch. Watch for overlapping the Step.

My dog is unable to stand for a session of Response5. Can I do a session?

Yes. Steps 1-2-3-and 5 are all quite easy to do from this position. Start with the best you can and don't worry if it isn't perfect.

Tips and Hints:

Take your time when landmarking. Explore your dog.

Keep your pressure light and consistent throughout the session.

Remember to end the roll at the spine. Do not roll the dog over.

Remember to re-landmark if the dog happens to move during the Step. (It's bound to happen!)

Always respect the animal. There is NEVER a right or wrong way to do this.

Allow a 1-2 minute WAIT before beginning the next Step.

Response5 was easy to learn!

I found the added silent videos showing each step in slow motion very helpful!

- Kathy

Right now I am helping my dog Molly. I have seen a noted increase in her energy!

I personally like the videos and watch them several times over, prior to attempting each step:)

This journey will change your life and free your spirit! - Amanda

Response5

Response5 is the World Leader

for placing Neurological support into the hands of the non-medical field.

Our common beliefs (Yours and Mine) lend themselves to a new mindset of our role as Animal Care-givers:

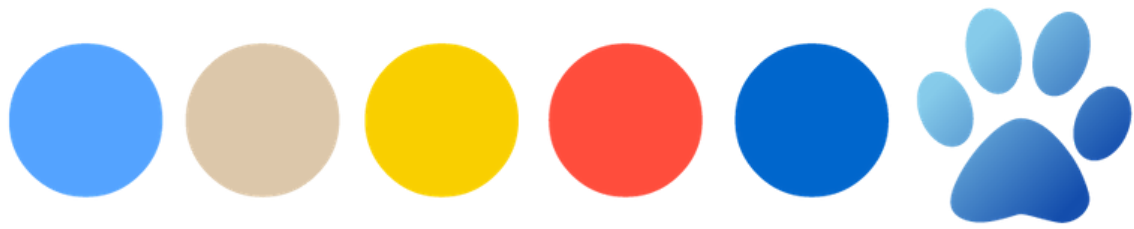

#1 - We have a high respect for the animals in our care.

#2- We're hyper vigilant in tending to their needs.

#3 - We're no longer satisfied with the limitations of Veterinarians.

#4 - We want to ensure that our animals have instant access to quality care.

#5 - We love to share our knowledge and skill sets to help other animals in need!
